

DOUBLE BAY
MEDITATION

Dear Rishi,

I want personally to invite every graduate of parts 1 to 6 of Exploring the Veda to step with me into the extraordinary dimension of Maha-Rishi consciousness.

In the course, Mastering the Siddhis*, exclusively for Rishis, both knowledge and experience will take a quantum leap, literally.

In my meetings I am asked frequently if one can learn "how to manifest". My answer invariably is, "you don't need to learn 'how to manifest', since your own manifestation of your entire world-experience is a continuous phenomenon in every waking moment. What you need to learn is the *mechanics* of how manifestation is already taking place, so you can enjoy manifesting that which will be most helpful to your evolution. This, rather than to be at the mercy of ignorance, haphazardly manifesting useless experiences that waste time of life and waste life's energy."

Through mastering the siddhis, we master the mechanics by which the conscious Unified Field creates the laws of nature that uphold evolution. In this fresh approach to learning siddhis, complete intellectual understanding will go hand in hand with the practise of the techniques of Maharishi Patanjali, ancient cognizer of the Yoga Sutras. This will be the first time in this generation that the siddhis have been taught comprehensively - with complete knowledge of their source, mechanics, and purpose.

I invite and strongly encourage every Rishi to become a Maha-Rishi through enjoying the unique course of Mastering the Siddhis.

All my best wishes and blessings of Shri Guru Deva.

Jai Guru Deva
Thom Knoles
